EMBRACE NOISE

SORDIN SUPREME

# A step ahead of your prey

A gust of wind in the bushes? Or your prey about to present itself? With a high-end electronic hearing protector such as Sordin Supreme, you'll be able to tell the difference. Not only does it protect your hearing, it enhances it – allowing you to locate your prey more accurately and take your shot faster. Sordin Supreme is legendary for its excellent sound quality, placing you a step ahead of your prey.

In 2024, we are launching the Bluetooth® product Sordin Supreme X2BT – hunting hearing protection perfected. We based it on the SordinFLEX™ design platform, allowing you to easily reconfigure it yourself.

## AUDIO PROFILES

# Be the best you – all day

Audio supremacy is a well-known, traditional Sordin Supreme hallmark. Now we turn up our sound quality one more notch. Using four audio profiles, you can adapt the sound image to the actual situation you are currently in. Not only will a perfect sound quality all day add to your comfort and situational awareness – it will make you a better shot and hunter.

We asked our engineers to boost the already market-leading SordinHEAR audio system. They came back to us with the most advanced system available in electronic hearing protection – SordinHEAR2. Select one of four audio profiles to perfectly adapt the sound image to your current hunting situation. Unleash the sound of science and start performing at your peak with the help of SordinHEAR2!

### Hunter

The normal audio profile for general purposes. Gain and frequency are set at normal levels in order to mimic natural ambient sound and to balance situational awareness and comfort.

### Shooter

A comfort profile with reduced gain and a narrower frequency spectrum. Perfect at the shooting range when situational awareness and ambient sound are of secondary importance.

### Focus

Increased gain and frequency spectrum, allowing you to pick up weak sounds. Or, use Focus together with Sordin earplugs for extra high attenuation while maintaining a degree of ambient sound (Earplug mode).

### Ambient off

Ambient sound is deactivated and your hearing protector uses passive protection only. However, X2<sup>BT</sup>'s Bluetooth and Pro-X's 3.5-mm AUX input will remain active, allowing for clear communications even in noisy environments.

## AMBIENT SOUND

# Stay in focus all day

Ambient sound is a key feature in every electronic hearing protector. It helps you maintain situational awareness while wearing your hearing protector – thus improving both safety and comfort. But it takes the finest technology available to make your surroundings sound truly natural. You need excellent directional sensitivity to accurately assess the direction to a sound source. You also need a short decay time, restoring your normal ambient sound image immediately after your shot. All qualities contributing to Sordin Supreme's ambient sound supremacy.

# 82 dB

### Safe hearing protection

Advanced software algorithms are used to hear ambient sound while protecting your hearing. Weak sounds are amplified for enhanced hearing, while any sound pressure exceeding 82 dB(A) is compressed to a safe level. Over 30 years of continuous development has made the Sordin Supreme sound experience unique.

## Sordin Supreme X2<sup>BT</sup>

Enjoy the wireless freedom of Sordin Supreme X2<sup>BT</sup>. The new 2024 hearing protector family comes with built-in support for Bluetooth®. You can connect X2<sup>BT</sup> and establish a reliable wireless connection with your Bluetooth® hunting radio or mobile phone.

# HUNTING RADIO INTEGRATION

## Smooth teamwork

Clear and reliable communication is key to safe and successful hunting. Sordin Supreme supports most popular hunting and 2-way radios\* out there. With X2<sup>BT</sup>, you connect your hearing protector to a hunting radio wirelessly using Bluetooth®. Pro and Pro-X models are connected by cable using the built-in 3.5-mm AUX input. Make your Supreme a natural part of your standard field equipment – and you have an easy and reliable way of staying connected at all times.

\* A list of supported radios will be available on [sordin.com](https://www.sordin.com) later in 2024.

## Sordin Supreme Pro, Pro-X, Pro-X LED

### AUX input

A 3.5-mm AUX input comes as standard on Pro and Pro-X models. Use this proven interface to connect to a hunting radio or mobile phone. Reliable voice communication ensured even in harsh conditions. (Wired device connection not included on X2<sup>BT</sup>.)

PERFECT COMFORT

# It's all in the details

When it comes down to it, comfort is everything. If your hearing protector doesn't fit you well, you simply won't wear it! That's why we spend so much time and effort to make Sordin Supreme the most comfortable hearing protector of all. Besides fitting nicely on your head and around your ears and staying firmly in place, it is tailored for shooting with its compact cups with rounded edges. And when you're done wearing it for the day, it folds up neatly and compactly.

## Compact cups

Given their superb attenuation, Sordin Supreme cups are surprisingly compact in design. Their rounded edges make shooting easy both for right- and left-handed shooters.

## Firm headband

The sturdy headband makes Sordin Supreme fit firmly on your head. Besides leather, selected models come with a detachable, washable textile headband. All Supreme models are also available in neckband version.

## Hygiene kits

Your Sordin Supreme deserves the best treatment. And let's face it, the sealing rings do get a bit messy after some time. No worries, we have replacement hygiene kits including rings and inserts for gel, TPE foam or memory foam rings (X2<sup>BT</sup> only).

## Gel rings

The soft silicone gel rings make Sordin Supreme super-comfortable to wear and effective even for eyeglass wearers. They reduce the pressure around the ears, while ensuring optimum noise attenuation. (Gel rings are standard on Pro-X LED and X2<sup>BT</sup>. Memory foam rings available for X2<sup>BT</sup>.)

## Ergonomic push buttons

Easy-to-use push buttons make it easy to turn on/off the electronics, and to control the ambient sound, or the hunting radio or cellphone volume – even when wearing gloves.

## SFA versions – 31 dB!

Sordin Flexible Attenuation (SFA) models of Pro-X and Pro-X LED come with an extra detachable insert and distance ring, allowing you to shift between our all-time-high SNR 31 and 27. (X2<sup>BT</sup> not available as SFA models.)

## Extra wide fit

Sordin Supreme Pro-X Slim models come with a leaner cup suspension design, allowing for a wider fit around the head. Perfect for users with a slightly larger head shape.

SPORTS AND RECREATION

# Boost protection and performance

Choose Sordin Supreme as your dependable companion for leisure activities, whether you're preparing for the upcoming hunting season or a shooting competition. Experience the rare blend of slim cups and high attenuation, ensuring comfort and safety during long sessions at the range. With the added benefit of maintaining situational awareness, you can effortlessly pick up on ambient sounds such as verbal instructions and alerts while focusing on your activity.

SNR **31** dB

#### Sordin Supreme Pro-X SFA

Supreme Pro-X SFA was developed specifically for shooting sports and recreational shooting. The extra high attenuation makes this specialized Supreme model particularly suitable when there is intensive firing going on around you.

SNR **40** dB

#### Earplug mode

Earplug mode gives you a certified SNR value of up to 40 dB by using your Sordin Supreme X2<sup>BT</sup> together with Sordin SoftEar M/L ear plugs. Select the Focus audio profile to maintain a degree of ambient while benefitting from extreme attenuation.

## BUILT-IN LED LAMP

# Let there be light

It may seem an insignificant detail at first glance. But once you get used to it, there's no turning back from having a powerful light source always available and ready to use. Just press an easy keypad combination to activate the built-in LED lamp, which is powered by the same batteries as the electronics. No need to wear a headlamp, nor to dig in your pocket to get your flashlight out. This clever feature is available only on our Pro-X deluxe version, Pro-X LED. A must for anyone hunting at latitudes where daylight wanes fast.

Press and hold the - and + buttons simultaneously to switch the LED lamp on or off.

A LED lamp is located at the front of the left cup on Pro-X LED models.

Built-in LED light available

## A FAMILY OF THREE

Sometimes it takes special vocabulary to describe things properly. How else to portray the Sordin Supreme product family? While every member is, by definition, supreme – the attenuation efficiency, sound quality and robustness – some models are simply even “supremes.” Which Sordin Supreme family member are you? Choose between Pro-X, Pro-X LED and X2<sup>BT</sup>. A true, and rare, win-win-win selection!

# Supreme

## Sordin Supreme Pro-X

Given the robust design of Pro-X – including SFA, Slim and neckband models – its 5-year warranty may almost seem superfluous. But Supreme users are known to push their product to the limit and if you're one of them, go for Pro-X!

# Supremes

## Sordin Supreme Pro-X LED

Some people always want the special features. The built in LED lamp and 5-year warranty makes Pro-X LED the crown jewel of the Pro-X family.

# Supremest

## Sordin Supreme X2<sup>BT</sup>

X2<sup>BT</sup> takes Supreme to new heights. This new 2024 release is built entirely of components designed specifically for X2<sup>BT</sup>. Based on the SordinFLEX design platform, X2<sup>BT</sup> is a flexible wonder that you can redesign as you like.
